

INSTRUCTIONS BEFORE SURGERY

Please wear loose fitting clothing with short sleeves and low-heeled, secure fitting shoes. (NO FLIP FLOPS!!)

Contact lenses, Jewelry, and dentures must be removed at the time of surgery.

Tongue/lip piercings must be removed prior to surgery.

Do not wear lipstick, excessive make-up, or nail polish on the day of surgery.

If you have an illness such as a cold, sore throat, sinus infection, stomach or bowel upset, please notify the office as soon as possible before your scheduled surgery.

Please make prior arrangements before surgery to have someone available to check on you throughout the day, after surgery, or provided assistance at night if needed.

Please take medications as directed by the Doctor before your scheduled surgery.

Patients under the age of 18 MUST be accompanied by a parent or legal guardian at the time of their surgery.

BEFORE IV DEEP OR CONSCIOUS SEDATION

You may not have anything to eat or drink (including water) for eight (8) hours prior to surgery.

If you have anything to eat or drink before a planned IV anesthetic, it is important that you inform the Doctor upon your arrival. Eating or drinking prior to a planned IV anesthetic will necessitate your case be rescheduled or cancelled. To proceed would put the patient in increased risk for otherwise avoidable complications.

No smoking at least 12 hours before surgery. Ideally, cut down or stop smoking as soon as possible prior to day of surgery.

A responsible adult must accompany the patient to the office, remain in the office during the procedure, drive the patient home and spend a minimum of 18 hours or longer if drowsiness or dizziness persists. NO exceptions!!

Patients who normally take prescription medication should do so with the smallest sip of water necessary, as directed by the Doctor before a scheduled IV anesthetic.

We recommend purchasing ice packs prior to your surgery as they will be used post operatively.

Please remember to use the restroom immediately before your appointment time.

The patient should not drive a vehicle, operate machinery, make important financial decisions or drink alcohol for 24 hours following the anesthesia experience.

If you have any questions or concerns don't hesitate to call the office to speak with a nurse.
